

TPLD-100

Addressable loop gateway card

Description

The TPLD-100 card allows the connection of the CCD-100 conventional control panels range and the CCD-103 extinguishing panel to the Detnov CAD-150 addressable loop.

The installation of the TPLD-100 card gives any addressable installation greater flexibility in the distribution of the devices, as well as the possibility of integrating an extinguishing system into the Detnov addressable loop.

Features

- Allows to connect a CCD-100 conventional control panel range to the loop of any CAD-150 addressable control panel
- Allows to connect a CCD-103 extinguishing control panel to the loop of any CAD-150 addressable control panel
- No configuration is required

Technical features

Connections	2 x 1,5 mm ² twisted and shielded cable	
Environment	Operating temperature:	From -5°C to +40°C
	Relative humidity:	95% without condensation
