5.8G 1km Wireless Bridge with 802.11ac

#### **Series Overview**

Wireless Bridge from the WBC series provides a great solution for scenes that require high transmission rates. The device has a throughput rate that is higher than 500 Mbps through its powerful hardware, which was designed with 802.11ac technology based on radio and Time Division Multiple Access (TDMA). The Gigabit Ethernet port can utilize the full capacity of the radio when used in a point-to-point (PTP) or point-to-multipoint (PTMP) network design. WBC series devices are not only backwards compatible with Dahua Wireless devices through TDMA, but also help to expand and upgrade existing networks over time using the latest technologies. The device also supports PoE input and PoE output (802.3af), effectively simplifying installation. It also comes with a built-in 2.4GHz Wi-Fi module that allows operators to remotely manage the device.

#### **Functions**

#### **Cloud Management**

Devices can be managed through the DoLynk Care app and performs real-time monitoring of the network. The app also displays the status of devices, triggers alarms for errors in real time and sends notifications.

# **Quick Deployment**

Network devices can be configured, and topologies are automatically generated.

# **Industry Standard Protection**

Built to meet the industrial design standards, the device is highly reliable and stable. It is also IP65-rated, waterproof and dustproof.

## **PoE Input and Output**

The device performs operations using the power it receives from the PoE power supply, and outputs PoE power to PD devices. This reduces the number of cables needed for installation.

- Strong signal: With its enhanced antenna, the peer-to-peer transmission distance reaches up to 1 km (3,280.83 ft).
- Wide operating temperature: -30 °C to +65 °C (-22 °F to +149 °F).
- Easy installation: Supports multiple installation methods such as wall mount and pole mount.
- High protection: IP65 rated, it is suitable for outdoor scenes and withstands severe weather.
- Strong broadband: The bandwidth can reach up to 867 Mbps, ensuring there is no delay in transmission.

#### **Enhanced Antenna**

Features enhanced antenna gain for the stable transmission of wireless signals over long distances, and it has strong anti-interference capabilities.

#### **Wireless Management**

With its built-in 2.4 GHz Wi-Fi, the device can be wirelessly accessed and configured.

#### **TDMA Enhancement**

Adopts TDMA (Time Division Multiple Access) technology to stabilize video transmission bandwidth, and to locate wireless transmission hidden nodes.

#### Scene

Suitable for scenes that require long-distance transmission, such as parks, scenic spots, and factories.
