Dear All,

Change logs:

VERSA 1.09   2017-08-10

> Added
> - Compilation for VERSA Plus with new GSM
> - Partition option "time for entry in night mode"
> - Dual Path Reporting (see below) in reporting options
> - 3 positions in the lists of confirmation types in APT-100
> - ETHM-1/VERSA-ETH: option - alarm after 3 mistaken passwords
> - Function of battery change int VERSA-LCDM-WRL
> - VERSA Plus: module ETH option edition – time from GSM network
>   Change
> - VERSA Plus: synchronization of ABAX system in the end of service mode only if a ABAX device was added/deleted (not in case of VERSA-LCDM-WRL)

Dual Path Reporting is new requirement of ATS6, which is a norm for the communication modules under GRADE 3. In case of event the communication, performed on any type of communication, will be sent to 2 indipendend monitoring stations. Check the pictrures below.

DLOADX 1.17.002   2017-07-26

Added
- Support of VERSA Plus with QUECTEL
- VERSA: Partition option "time for entry in night mode"
